STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. UDALL (for himself, Mr. BLUMENTHAL, Mr. BOOKER, Mr. DURBIN, Mrs. GILLIBRAND, Mr. MARKEY, Ms. HARRIS, Mr. CARDIN, and Mr. MERKLEY):

S. 1624. A bill to prohibit the use of chlorpyrifos on food, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

Mr. UDALL. Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 1624

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Protect Children, Farmers, and Farmworkers from Nerve Agent Pesticides Act of 2017".

SEC. 2. FINDINGS.

Congress finds as follows:

(1) In 1996, Congress unanimously passed the Food Quality Protection Act of 1996 (Public Law 104-170; 110 Stat. 1489) (referred to in this section as "FQPA"), a comprehensive overhaul of Federal pesticide and food safety policy. That Act amended the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136 et seq.) (referred to in this section as "FIFRA") and the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.), the laws that govern how the Environmental Protection Agency (referred to in this section as the "EPA") registers pesticides and pesticide labels for use in the United States and establishes tolerances or acceptable levels for pesticide residues on food.

(2) The FQPA directs the EPA to ensure with "reasonable certainty" that "no harm" will result from food, drinking water, and other exposures to a pesticide. If EPA cannot make this safety finding, it must prohibit residues and use of the pesticide on food. The FQPA mandates that EPA must consider children's special sensitivity and exposure to pesticide chemicals and must make an explicit determination that the pesticide can be used with a "reasonable certainty of no harm" to children. In determining acceptable levels of pesticide residue, EPA must account for the potential health harm from pre- and postnatal exposures. The economic benefits of pesticides cannot be used to override this health-based standard for children from food and other exposures.

(3) Chlorpyrifos is a widely used pesticide first registered by EPA in 1965. Chlorpyrifos is an organophosphate pesticide, a class of pesticides developed as nerve agents in World War II and adapted for use as insecticides after the war. Chlorpyrifos and other organophosphate pesticides affect the nervous system through inhibition of cholinesterase, an enzyme required for proper nerve functioning. Acute poisonings occur when nerve impulses pulsate through the
